Peerless Toolbox

Welcome! Peerless is a leading manufacturer of Architectural Aluminum windows and doors. We provide some of the most energy efficient and innovative products in the industry. Some tools in this toolbox are open to the public while others require you to sign in. If you were given a login simply click the Sign In button below.

Sign in

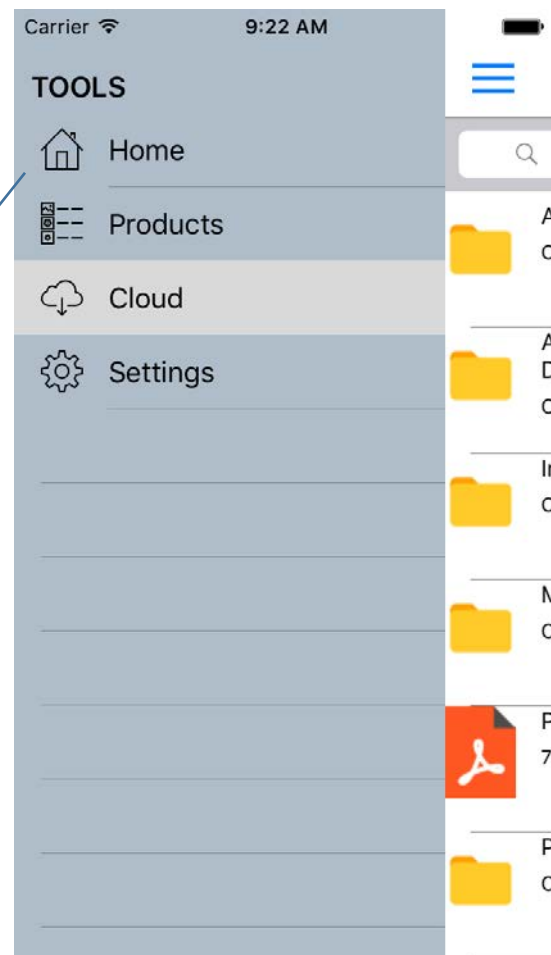

Tools

First Launch

When the Peerless Toolbox is first launched you are given a chance to enter your email address. This will help us see how the app is performing and being used allowing us to make improvements in the future. We **DO NOT** sell your information or give it to anyone that would cause you to receive spam from any 3rd parties.

Tool Tray

There is a menu called the tool tray that you can open by either pressing the icon in the upper left-hand corner or swiping from left to right.

Note: Some tools require authentication and special permissions. In that case you will see the Peerless Security page as shown below.

Peerless Products Login

If you have a personal Microsoft account that matches your Peerless account you will be prompted to choose between Work or Personal. Choose Work.

Sign in

When prompted enter your Peerless user account and append @peerlessproducts.com. For example, if your account is jdoe you would enter jdoe@peerlessproducts.com. **Note that this is not necessarily your email account. It is a login format for Peerless Products.**

Products Page

Helps you find the right window or door for the job. It is similar to the Product Selector on the Peerless website. It is grouped by series and expands or collapses when tapped. The number displayed lets you know how many items are in the group. The total number of Configs in the list is also shown at the bottom.

View Details

One way to view the products details is to select the desired product from the list and press the View Details button in the top right corner. Remember to select a product first!

Note: The first time you open this page it will need to download the list of products (or configs). The time this takes will depend on your connection speed. It will then keep a local copy on your device but will try to download a fresh copy about every 7 days to make sure it has the latest data. You can also manually download the latest products by using the "Pull to Refresh" feature. When the top of the list is visible simply Swipe Down to refresh the list.

Also Notice that in Figure 1 below a long press will give you other options such as expanding or collapsing all groups or clearing the filter.

Alternatively, to view details, you can long press (Figure 1) any product row and select View Details from the Pop Up menu. Or you can Swipe Left (Figure 2) on any product row and select Details.

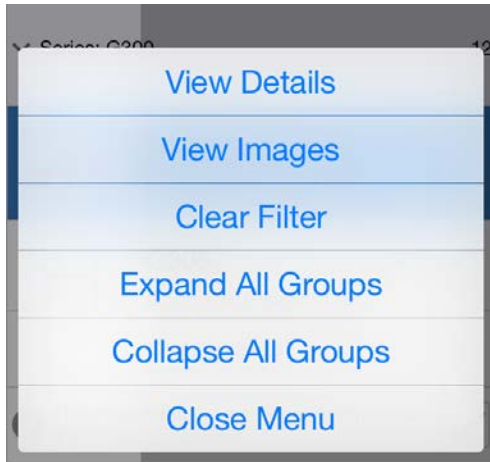

Figure 1 - Long Press on Product Row

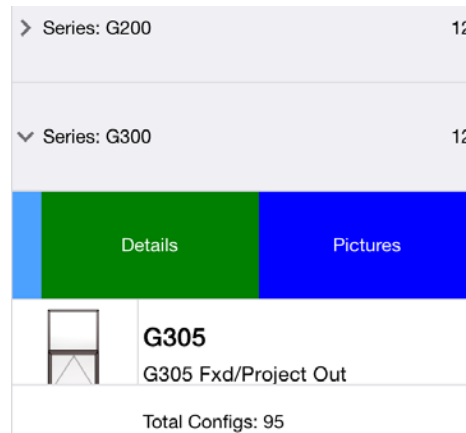

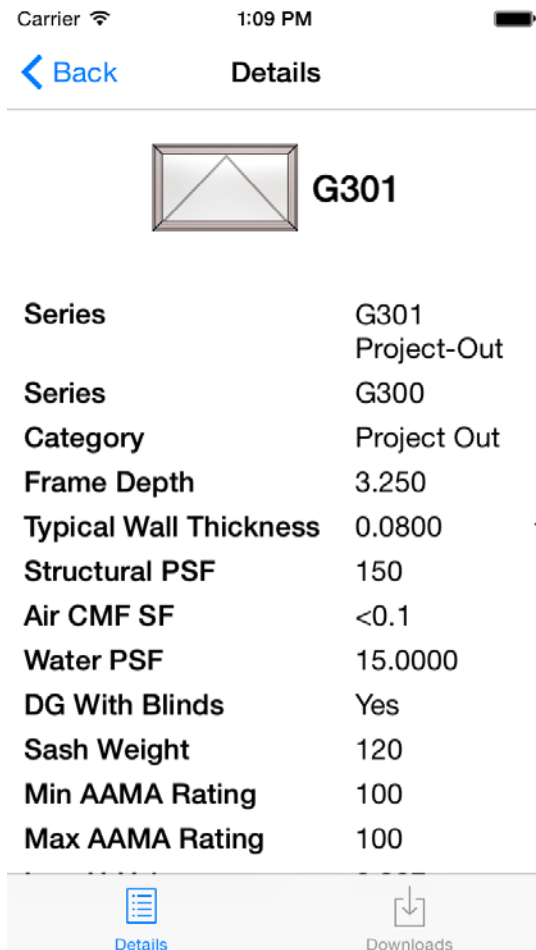

Figure 2 - Swipe Left on Product Row

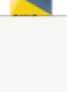

Product Details

The Details Tab shows a scrollable list properties for a given product.

Downloads

Product Downloads

Pressing the Download Tab displays a list of downloadable resources. Tap once to download. The Icon will change to show it's complete. Simply tap again to open with another app on your device. You can then save or share the document as usual.

Swiping Left will also give you the opportunity to Open the document or Delete it from your local storage.

Product Pictures

As shown on in Figure 1 & 2 on Page 3 you can Long Press or Swipe Left on a product row to reveal the option to view pictures related to a specific product. This will be used more in the future.

Note: At the bottom of the image viewer it will indicate the number of total images available to view. Simply swipe left or right to rotate through the images.

Filter Page

Scroll through the list of options selecting the specifications for your premium architectural windows and doors. Tap Filter Products when done.

The Filter Panel (Figure 3) at the bottom of the Products list shows you the criteria you have selected for the filter. You can disable or enable the filter by tapping the checkbox on the right side of the panel. Or you can delete it by tapping the X on the left side.

The Peerless Cloud

Tap on folders to see the contents. Tap files once to download them. After they are downloaded tap again to open them. A long press will give you options to download or open. It also gives the option to delete files from your device that have been downloaded. When viewing a folder, the menu button in the upper left-hand corner becomes a back button.

About

Peerless Toolbox

The Peerless Toolbox App offers the Peerless Team a quick, easy and direct way to access all of our most valuable tools and information.

Version 1.3

Settings Page

The settings page provides basic information about the Peerless Toolbox mobile app and also allows you to tell the app to only download over WIFI only to avoid possible cell data expenses. Contact information is also added at the bottom of the page.
